

LIST OF RESOURCES EXAMINED AT WWW.TRUTH-DEFINED.COM AS OF DECEMBER 2018

* Rating system: **3= Of High Value** / **2= Of value** / **1= Of Little or No value in the study of the Nature of Truth**

- This file is part of an extensive database which contains information about documents which I have examined. The database contains facts about the document itself, relevant quotations and brief personal comments. It deals with several topics, but especially with the Nature of Truth [noT].
- The database contains not only the names of books, articles and web pages, but also informative entries from word studies such as dictionaries, encyclopedias and lexicons.
- To my knowledge, this is the most extensive Bibliography on the noT in existence.
- Documents with intriguing titles but which add little or no value to my studies are listed as a historical record of my investigations. These documents may have been cited by one or more authors in discussions of the noT.
- Anthologies are listed by each individual article and also by the book itself. Articles in these books that have no bearing on the noT are not listed at all. An anthology is given the highest rating that one of its articles has earned.
- Duplicates of important texts are listed because of significant differences in translation or edition.
- A document is given a high rating if it sheds light on the nature of truth. That could be by an incisive statement, a discerning question or by supplying a fruitful bibliography.
- A high rating does not necessarily mean that I agree with the author's conclusions.
- The date listed is the copyright date of the book in hand, not necessarily the date when the document first saw the light of day.
- For undated documents, [date] means the date when I first accessed the document or {latest date} evident in the text.
- This Bibliography is updated often as my investigations into the noT continue.
- Your suggestions will be examined and added to this database if relevant.
- Please inform me of any errors at Q&A@Truth-Defined.com.
- FileMaker truncates data which extends beyond the length of the text box.

• More than 4000 documents have been evaluated.

As of December 2018, for the sake of brevity, unrated documents will not be included in this Bibliography.

AUTHOR	* TITLE	FIND IN DOCUMENT/ WEBSITE/ DICTIONARY	DATE
